

EVS– PRIMARY CLASSES

PLMS +p – User Manual – P4

SEPTEMBER, 2017

PRAVINYA
www.pravinya.net

Dear Teacher

Greetings! Namasthe! Aaadab!!

We at PRAVINYA always feel that teaching is a very noble profession and the most important foundation for the society.

We are living in the digital age. All around us, children are observing and quietly learning from the audio-visual media namely phones, TVs, movies and others Thus Digital education is only an extension of the dramatic impact of the audio-visual education that children today are already exposed to.

EVS studied at the Primary school level lays the foundation for study of Sciences and social sciences If we can inculcate curiosity and observation in early childhood, they would be able to inculcate conceptual understanding of Sciences at the secondary and higher levels. Keeping in view, the importance of EVS in Primary classes, PLMS +p brings you **97 Modules** the following options this year. In most modules **Quizzes** are also built in. Some of these need to be accessed from PLMS and the rest from ToonMasti. These details are mentioned in the [lesson-wise detailed index](#) provided to you in this document. **In the Lessons Index, you can locate the class of your choice, Unit which you wish to teach, all the modules linked to that unit, its source, type of content – whether it is video content or interactive content and if it is video content then its duration. These details help you to plan for your lesson using the digital tools.**

ToonMasti – EVS modules

ToonMasti is an educational software package developed by EYF (Ernst and Young Foundation) for Government schools. It offers EVS lessons for classes 1 to 5 which are mapped to our curriculum for classes 2 to 5. It is developed for joyful learning and children get very attracted to its format.

At the time of teaching a new lesson, please refer to the index given at the end of this document. You may find that the lesson is covered. If you look at the source, you will notice that the source may be ToonMasti or PLMS. You need to access the relevant application depending upon the source.

Lessons in EVS

The lessons are in a story format in English medium. It will help young learners to easily pick up English vocabulary as well as pronunciation while learning the EVS concepts. We have provided lesson-wise mapping for your convenience and ease of use.

Pictionary

Pictionary, which means Pictures based dictionary, helps to build vocabulary in a joyful manner. Vocabulary is presented under 26 different groups such as Animals, Birds, Seasons, Shapes, and so on. A number of these topics overlap with EVS concepts and it is an attractive tool for children to learn words related to EVS.

To learn how to use ToonMasti, please see the User help- ToonMasti.pps.

PLMS+p

PLMS contains EVS lessons in Telugu medium as per the text book prescribed by SCERT from two different sources - PRAVINYA (14 videos) and SIET (4 videos).

PRAVINYA EVS lessons

EVS lessons developed by PRAVINYA cover the text book lesson and include activities prescribed. Through the rich visual content, it becomes easier for the child to relate to the topic and develop a more realistic understanding of the concept.

SIET EVS lessons

EVS lessons provided by SIET are actual class room videos by Subject teacher. By playing these lessons, a whole unit is covered as per the stipulated pedagogy for EVS. The interactions between the teacher are similar to a real classroom setting and students will therefore find it very easy to relate to the lesson.

To know how to access the PLMS lessons please refer to PLMS +p demo.

Teacher Tools

The approach to teaching EVS and pedagogy have undergone significant changes over the last few years. In order to understand why such changes have occurred and how to effectively use the current methodology to improve EVS concepts in students, please do watch the modules on Philosophical background developed by SIET and subject experts.

Teacher Training Modules for digital teaching

PRAVINYA is very glad to present Teacher training modules for digital teaching. These modules are available subject wise. They contain areas such as Basics of Computers for teachers, Introduction to different types of digital classes, Method of creating Lesson plans by integrating Digital modules.

You can register for your own copy of the Teacher training Modules at <http://www.pravinya.net/new--teacher-training.html>

End Note

We have brought to you different types of visually rich content from multiple sources to assist you in imparting basic education to young learners. We hope that students will find these easy and joyful learning tools and teachers will find these as useful teaching tools. We have also included ToonMasti and Teacher tools to widen the available range.

We sincerely hope that you find them helpful and enjoyable.

Team PRAVINYA

List of EVS for Primary classes
